People spend a lot of time and money on buying their ideal house. Once you have purchased your dream house and decorated it, it is time to think of protecting it. We often tend to overlook home security systems, until a burglary happens. It is safer to install home alarms and be prepared for any situation.

1. Protect your home away from intrusion.
2. Prevent fire disasters for your safety and property
3. Medical help for elderly people and disable.
4. GSM cellular communication/PSTN for alarm
5. Without monthly monitoring fee
